Transducers Direct is excited to introduce Another Industry First, the wireless fuel and water separator filter sensor for new and existing applications. Designed to quickly and effortlessly replace the existing filter T handles and mechanical gauges, our wireless sensor easily communicates with the user up to 250ft away and can be used in a variety of applications including construction, agriculture, marine and generator equipment along with being a troubleshooting aid to help identify issues.

The dedicated app is easy to use allowing users to quickly read vacuum levels remotely or from the safety of the helm or cab. This provides a simple to read display and logs the highest level to determine if a filter needs replaced because of dirt or contaminated fuel resulting in poor engine performance and shorter downtime.

Built on Transducers Direct TD1000 proprietary technology, the TDWLB-FF ensures high quality, high accuracy and is made in the USA!

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use. While we provide application assistance personally, through our literature and the Transducers Direct web site, it is up to the customer to determine the suitability of the product in the application.

REGULATORY COMPLIANCE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help

Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This device complies with Part 15 of the FCC Rules. Operation is subject to the two following conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by Transducers Direct could void the user’s authority to operate the equipment.

FCC ID: 2ACGE-TDWLBG2

This device complies with Industry Canada licence-exempt RSS standard(s) / CNR of Industry Canada for licence exempt radio devices. Exploitation is entitled to the following two conditions: (1) the device does not produce interference, and (2) the device must accept any radio interference suffered, even if the interference is likely to jeopardize the operation.

IC: 12056A-TDWLBG2
### SPECIFICATIONS

**Performance**

- **Pressure Accuracy**: 0.25% or 0.2 psi, whichever is greater, 1% BFSL (includes non-linearity, hysteresis, non-repeatability)
- **Temperature Accuracy**: ± 1°C
- **Overrange Protection**: 2x Rated Pressure
- **Pressure Range**: Vacuum (-14.7) to 15 psi standard range.
- **Burst Pressure**: 5x or 20,000 psi, whichever is less
- **Pressure Cycles**: >100 million

**Update Time**

- Bluetooth wireless technology (1 sec)

**Environmental Data**

- **Temperature Compensated Temperatures**: -10° to 85° C (14 to 185° F)
- **Operating Temperatures**: -40° to 85° C (-40° to 185° F)
- **Storage**: -40° to 125° C (-40° to 257° F) without battery
- **TEB**: 3% BFSL (includes: Non-linearity, Hysteresis and Non-repeatability)
- **Long Term Drift**: 0.2% FS/year (non-cumulative)
- **Shock**: 50g, 11 ms, 1/2 sine
- **Vibration**: 10g, peak, 20 to 2400 Hz
- **EMI/RFI Protection**: Yes
- **Ingress Rating**: IP-67
- **Approvals**: CE

**Mechanical Configuration**

- **Pressure Connections**: 9/16 -18 UNF 2A with integrated handle
- **Wetted Material**: 316 stainless steel
- **Case** (housing): 304 stainless steel and high-impact polycarbonate

**Electrical Data**

- **Power Supply**: 3.6V Proprietary replacement battery, battery life: 24 months, typical. Battery life is affected by high and low temperatures.
- **Battery Removal**: If battery pack is removed, you must wait 90 seconds to reinstall or unit may lock up.
- **Connection Distance**: 250 feet (line of sight)

**Compatible Devices**

- **Software**: Android - Version 4.3 or later
- **iOS**: Current version and previous one
- **Hardware**: Android - Device supports Bluetooth Smart (Version 4.0 and later)
- **iPad Gen 3 (released Mar 16, 2012)**
- **iPad Gen 4 (released Nov 2, 2012)**
- **iPad Mini Gen 1 (released Nov 2, 2012)**
- **iPad Mini Gen 2 (released Nov 12, 2013)**
- **iPad Air (released Nov 1, 2013)**
- **iPhone 5 (released Sept 21, 2012)**
- **iPhone 5C, 5S (released Sept 20, 2013)**
- **iPhone 6, 6 Plus (released September 19, 2014)**
